DETAILED ACTION

Allowable Subject Matter

Claims 21-40 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including, *in combination with other limitations recited in the corresponding claims*, the limitations of a brushless dynamoelectric device comprising:

(as recited in claim 21)

a stator comprises a bobbin-type, core-less, hollow through construction including pivotal support means for the axially disposed spherical rotor and having an air gap dimension there between;

(as recited in claim 26)

a stator comprises a bobbin-type, core-less, hollow through construction for the axially disposed spherical rotor having an air gap dimension there between wherein said stator and rotor are provided with a fixed shaft; and bearing arrangement for rotation;

(as recited in claim 34)

stator further includes pivotal support means for the axially disposed rotor having an air gap dimension there between, said pivotal support means comprises extended or molded spherical cavity sidewalls at bobbin sides for rotor containment wherein said air gap dimension is filled with a magnetic substance having fluidity that provides a hydrostatic pressure gradient along the entire spherical surface area and along the inside spherical surface areas of the cavity containment walls for suspension of the rotor having no shaft;

Comparing to the prior-art of the record, the most relevant ref is Yabe (JP-7-308056) wherein the rotor is constructed as a spherical rotor having a rotating shaft supported by a bearing (figs 9-10). However, Yabe does not disclose a stator that is constructed as a coreless-hollow-through bobbin including pivotal support means (63-64) for positioning the rotor within the stator bobbin at an air gap therebetween and wherein the shaft thereof is a fixed shaft instead

of a rotating shaft (as in Yabe's machine). Thus, none of the prior art references of the record, either stand alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

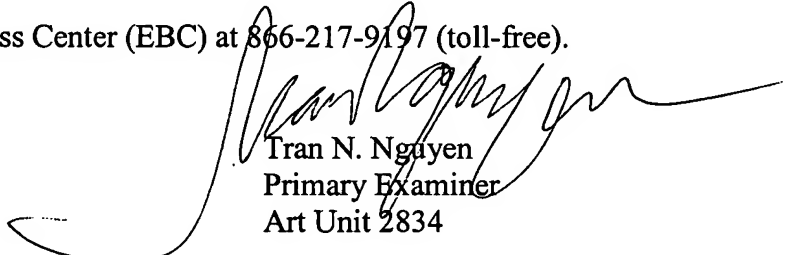

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
